## IT Intern, 100%

BIOTECHNOLOGY | NEXT GENERATION PROTEOMICS | RESEARCH SERVICES & TOOLS

Biognosys is the leading company in next generation proteomics. We offer services and products for precise, high-content protein quantification. Biognosys was founded in 2008 as a spin-off from the ETH Zurich in Switzerland. Located within the Bio-Technopark in Schlieren just outside of Zurich, we operate our own state of the art proteomics facility, providing services to pharma, biotechnology, agriculture and life science companies worldwide.

Our technology quantifies proteins with unbeatable precision and depth. Biognosys' mission is to make next generation proteomics widely available through our contract research services and our portfolio of innovative reagents and software products.

### THE OPPORTUNITY

Biognosys is pioneering the field of personalized medicine using proteomics with “big data” approaches. This includes opportunities and challenges regarding storage growth and CPU performance.

We are looking for an IT Intern to support our IT department. The IT department is responsible for IT infrastructure services as hardware, software, networking & services. The primary task of the IT intern is to give 1<sup>st</sup> & 2<sup>nd</sup> line support to circa 50 colleagues with their Windows systems, printers etc. The secondary task is to improve the enrollment of new Windows client systems, e.g. automating software deployment with unattended installation packages, central configuration management with Microsoft's Group Policies.

### THE PROFILE

- Education in IT infrastructure, computer science, or similar (apprentice ship or optional Bachelor)
- Knowledge of hardware, storage solutions and network components
- Experience with Microsoft solutions (e.g. Office 365, Windows)
- Service oriented
- Accurate, creative & flexible
- Very good knowledge of written and spoken English language; German is a plus but not required

### WORKING at BIOGNOSYS

We offer a dynamic work atmosphere in a young and motivated team. You will profit from an open and flexible company structure where personal initiative is appreciated and encouraged. Biognosys is backed by strong investors and offers the opportunity to grow with the company in a promising and innovative market.

### TAKE THE STEP
