System Administrator, 100%

BIOTECHNOLOGY | NEXT GENERATION PROTEOMICS | RESEARCH SERVICES & TOOLS

Biognosys is the leading company in next generation proteomics. We offer services and products for precise, high-content protein quantification. Biognosys was founded in 2008 as a spin-off from Prof. Ruedi Aebersold's lab at the ETH Zurich in Switzerland. Located within the Bio-Technopark in Schlieren just outside of Zurich, we operate our own state of the art proteomics facility, providing services to pharma, biotechnology, agriculture and life science companies worldwide.

Our technology quantifies proteins with unbeatable precision and depth. Biognosys' mission is to make next generation proteomics widely available through our contract research services and our portfolio of innovative reagents and software products.

THE OPPORTUNITY

Biognosys is making proteomics available to develop better drugs and life science products. Further, we are pioneering the use of discovery proteomics in clinical trials conducted according to Good Laboratory Practice (GLP) /Good Clinical Practice (GCP) regulations. Our facility generates an excess of 100GB of data daily and analyzing this data poses high demands on processing capacity. An efficient storage and computational environment are crucial.

We are looking for a System Admin to join our IT team. You will be responsible for 1st, 2nd and 3rd line support for more than 50 colleagues using Windows systems. You will maintain our IT infrastructure such as servers, storage, backup and DR site. Further, you will manage and administrate our network, the user environment and implement strategies for software distribution. Monitoring systems and the support of various cloud services are also part of your tasks. Documentation of your work according to GLP and GCP are key.

THE PROFILE

- Education in IT infrastructure, computer science, or similar (apprenticeship, Microsoft education or optional Bachelor)
- Knowledge and experience with Microsoft solutions (e.g. Hyper-V, Microsoft 365, Windows Server)
- Service oriented
- Knowledge in IT security
- Accurate, creative & flexible
- Strong documentation skills
- Experience in regulated environment (GLP, GCP, GMP) and with ISO 27001 are a plus
- Minimal 3 years experience in a similar role
- Very good knowledge of written and spoken English language; German is a plus but not required

WORKING at BIOGNOSYS

We offer a dynamic work atmosphere in a young and motivated team. You will profit from an open and flexible company structure where personal initiative is appreciated and encouraged. Biognosys is backed by strong investors and offers the opportunity to grow with the company in a promising and innovative market.
